California Collaborative Fisheries Research Program: Using a Citizen Science Model to Monitor California's Nearshore Fisheries (QUEST Webinar Series)

Join us for a Webinar on October 24th

Space is limited.

Reserve your Webinar seat now at:

<https://goo.gl/KZYTtM>

Date: October 24th, 2017

Time: 2:00 PM - 3:00 PM EDT

Location: SSMC3, Room 3404 (webinar will be shown from conference room)

Abstract: This webinar will focus on the development and implementation of the California Collaborative Fisheries Research Program (CCFRP), a citizen-science based program to support fisheries management. The CCFRP was formed in 2006 to participate in the monitoring of marine reserves established through California's Marine Life Protection Act. It was conceived and planned through a collaboration of scientists, managers and fishermen on the central coast of California. Data are collected each year by scientists and volunteers, including. The program, now in its 11th year, has expanded statewide and includes the involvement of 5 universities collaborating with fishing communities along the entire California coast. During the webinar we will talk about how we 1) engaged the community and government scientists in the development of the program, 2) how we involve citizens in the data collection, 3) what the data show about the impact of marine reserves on fish populations, and, 4) how the data are important to management of marine resources by state and federal agencies.

Presenters: Dr. Dean Wendt (Cal Poly San Luis Obispo), Dr. Rick Starr (Moss Landing Marine Laboratories), and Dr. Melissa Monk (NOAA Fisheries)

Seminar Series: This seminar is part of the NOAA Fisheries Quantitative Ecology and Socioeconomics Training (QUEST) Program's webinar series. Please

see <http://www.st.nmfs.noaa.gov/quest/resources/webinars> for more information.

Upcoming Webinars:

- **Tuesday, December 5th:** The dream and the reality: meeting decision-making time frames while incorporating ecosystem and economic models into management strategy evaluation. (Dr. Sarah Gaichas, Dr. Jonathan Deroba, and Dr. Min-Yang Lee [all NOAA Fisheries])
